

Integrated Sink Wall Module

Architectural Wallsz is a leader in the design of innovative, prefabricated modular solutions, using modern methods of construction (MMC) designed to reconfigure existing hospitals for your current needs and adapt easily to future challenges.

Hand hygiene is now regarded as one of the most important elements of infection control activities. Compliance can be improved by conveniently placed and well-designed hand wash facilities to promote best practices. The Integrated sink wall module gives you complete control of your handwash stations, fixtures and finishes and is fully compatible with all the Architectural Wallsz range.

Streamlined Construction

- Rapid installation
- Flexible, adaptable, and futureproof
- Minimal disruption on site
- Clean construction
- Fully compliant

Infection Control

- A choice of easy to clean surfaces
- Seamless and impact resistant
- Compatible with all healthcare cleaning procedures
- Optional touchless technology

Integrated Sink Wall Module Innovative and Hygienic

The Flexibility of our designs, innovative features and the advantages of off-site fabrication combine to offer you fast, affordable, and sustainable solutions.

Meeting your Net-Zero carbon targets while achieving the wider social value priority and encompassing all the following patient care objectives

Our Promise:

- 10 year guarantee on materials
- Designed to meet your site requirements
- Precise and upfront quotations
- Intelligent 3D rendering and VR review
- Maintenance and packages available
