

AWallsz

Segregation and Isolation Pods

Architectural Wallsz is a leader in the design of innovative, prefabricated modular solutions, using modern methods of construction (MMC) designed to reconfigure existing hospitals for your current needs and adapt easily to future challenges.

Our modular isolation and segregation pods are rapid to assemble and include built-in HEPA 14 air filtration and purification 99.997% efficient, 0.3 μ , with the option of plumbing and plug and play technology.

Patient Well Being

- Improved privacy, dignity, and patient experience
- Assists in patient cohorting
- Creates a quiet and calm environment for patients
- Choice of positive or negative HEPA 14 ventilation

Infection Control

- Easy to clean surfaces
- Seamless and impact resistant
- Compatible with all healthcare cleaning procedures
- A solution to suit all areas

Isolation and Segregation Pods

Meeting patient care objectives

The flexibility of our designs, innovative features and the advantages of off-site fabrication combine to offer you fast, affordable, and sustainable solutions.

Meeting your Net-Zero carbon targets while achieving the wider social value priority and encompassing all the following patient care objectives:

- Manage HAI effectively
- Increase single patient room occupancy
- Increase visibility of patients
- Better patient flow
- Reconfigurable and moveable

Our Promise:

- 10 year guarantee on materials
- 30 years expected lifespan
- HVAC consultation provided for your project
- Precise, upfront quotations
- Intelligent 3D rendering and VR review
- Maintenance and service packages available
